Call for abstracts

You are kindly invited to submit an abstract for the 5th International One Health Congress through the congress website at www.onehealthcongress.com.

Guidelines and the abstract submission tool are available online. Be sure to submit your abstract by the <u>deadline of 15 February 2018</u>. Accepted abstracts will be allocated to the appropriate session.

Notification of acceptance and instructions for oral or poster presentations will be sent by 15

March 2018 via e-mail.

The 5th International One Health Congress welcomes the submission of abstracts on the following topics:

Social science and politics

Pathogenesis

Drivers for emerging diseases

One Health in underprivileged communities

Vaccines

Infectious diseases from an ecohealth perspective

Use of antibiotics in human and animals, in food and agriculture and the link to AMR and environmental impact

Genomic epidemiology/ evolution of antimicrobial transmission

Real life applications of whole genome sequencing

Prevalence and surveillance of antimicrobial resistance

Novel strategies for AMR interventions and preparedness

Alternative approaches to tackling resistant infections

Rapid diagnostics in AMR interventions

About the 5th International One Health Congress

In June 2018, the 5th
International One Health
Congress will bring
together some 1,500
researchers, policy makers
and practitioners from
universities, governments
and industry who are
working towards integrated
approaches and effective
responses to complex global
health challenges.

To capture the multifaceted One Health concept, the congress will have three separate programme tracks. The **One Health Science (OHS)** track focuses on zoonoses and emerging and re-emerging infectious diseases. The **Antimicrobial Resistance (AMR)** track is dedicated to investigating, preventing and controlling antibiotic resistance. The **Science Policy Interface (SPI)** track is a tailormade programme for public health officials and government representatives, offering information and practical application based on the most recent scientific insights.

A series of plenary sessions and satellite symposia will provide a platform for transdisciplinary interaction and exchange of ideas in a true One Health spirit. The 5th International One
Health Congress is organized
by the One Health Platform
and the University of
Saskatchewan, in close
collaboration with the Southern
African Centre for Infectious
Disease Surveillance (SACIDS),
CDC Kenya and One Health
Eastern & Central Africa
(OHCEA).
